VidTroniX

PRINTERS FOR THE TWENTY-FIRST CENTURY

The VidTroniX MAP is a three path travel document printer that prints on two boarding pass stocks and one baggage tag stock in succession using a single printhead. Given the small size of the MAP printer and its ability to print on three separate stocks it is able to take up much less space than the three printers it essentially replaces. There are separate interface connections for the boarding pass and baggage tags allowing for dual host configurations. Each printer is individually tested using the customer's stock and data message to ensure that the printers will operate properly upon receipt, which prevents needless troubleshooting and adjustments.

Specifications

DIMENSIONS (H x W x L)	173 x 177 x 211 mm │ 6.8 x 7.0 x 8.3"
WEIGHT	<4.6 Kg (10 lbs)
PRINT TECHNOLOGY	Direct thermal Motor controlled head lift feature
PRINT SPEED	Up to 6 Inches per second Up to 30 coupons per minute
PRINT RESOLUTION	200 dpi or 300 dpi
PRINT HEAD REPLACEMENT	1/2 Minute – no tools required
PAPER HANDLING	Near straight paper paths 3 Paper feed paths selectable Path 1 and 2 are both ATB Path 3 is Bag Tag
PAPER WIDTH	2.125 Inches (bag tag) 3.250 inches (ticket and boarding pass)
PAPER SEPARATION	Motor operated burster
ELECTRONICS	Microprocessor controlled Power backed RAM Standard flash ROM Optional flash ROM 2MB
SYSTEM INTERFACE	ATB Host – RS232C to 38,400 baud Bag Tag Host – RS232C to 38,400 baud RJ45 Connectors Optional USB Interface available Optional LAN (IP) interface available
DISPLAY LCD	2 rows with 16 characters With backlight
OPERATOR CONTROLS	Operator switch LED - Power, LED - Error, LED - Stock out bin 1 LED - Stock out bin 2, LED - Stock out bin 3, LED – Ready 1, ATB, LED – Ready 2, BagTag
POWER SUPPLY	A/C power: universal input 100-240V~1.8A, 50-60Hz
OPTIONS	Integrated RFID Module Gen 0, Gen 1, Gen 2 Metal Cabinet for securing and feeding stock

Optional Metal Cabinet: *For secure storage and feeding of boarding passes and baggage tag stock.*
